

Brandon T. Pae

Boston, MA | (917)-565-0084 | brandon.pae@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

SUMMARY

Technical: Drone firmware and model predictive control, machine vision in production, autonomous navigation

Client-facing: Manufacturing operations strategy at BCG, 600+ students mentored, two products launched

EDUCATION

Columbia University | **GPA: 3.99**

New York, NY | May 2026

Bachelor of Science in Computer Science, cum laude, Minor in Entrepreneurship

- Relevant Coursework - [Operating Systems](#), [Advanced Programming in C](#), [Parallel Optimization for Robotics](#), [VR/AR \(Unity\)](#), Artificial Intelligence, Natural Language Processing, Data Structures, Software as a Service

WORK EXPERIENCE

Boston Consulting Group (BCG), *Summer Associate*

Boston, MA | Jun 2025 – Aug 2025

- Built and automated Excel-based financial models tracking EBITDA and OWC for an industrial goods client
- Scoped AI automation opportunity under ambiguity and presented recommendations to senior client leadership

FluidityIQ, *Software Engineering Intern*

New York, NY | Jun 2024 – Sep 2024

- Deployed patent search vectorizer via Azure CI/CD; cut API latency 6x and resolved 75% of bugs
- Built LLM patent summarizer with LangChain; redesigned chat for concurrent users, reaching IP lawyer customers

Capco, *Software Engineering Intern*

New York, NY | Jun 2023 – Aug 2023

- Fixed 66% of bugs in a major U.S. bank's permissions service and presented results to 30+ executives; work integrated into client systems

ROBOTICS & SYSTEMS

- [A2R Lab](#) (Sep 2024 – May 2025): Optimized tinyMPC for model predictive control on Crazyflie drones under strict onboard compute limits; integrated C/C++ firmware with ROS 2 and flight-tested for IROS paper submission
- [PacBot](#) (Sep 2023 – May 2024): Tuned A* heuristics and built ghost-prediction for Columbia's 2024 PacBot entry, a robot playing Pac-Man autonomously on a physical maze; prototyped deep Q-learning policy
- [Artaic](#) (Feb – Dec 2023): Built a YOLO model with Roboflow classifying mosaic tiles at 91% accuracy, replacing manual pre-shipping checks

PRODUCTS & RESEARCH

- [Unscripted](#) (May 2026 – Present): Building an AI career coaching platform that logs networking conversations and surfaces who to follow up with, anonymizing personal details before they reach the model
- [AI Safety](#) (Dec 2025 – May 2026): Fine-tuned 8B LLMs to study deceptive reasoning and found 0–5% increase in misrepresentation of internal state; selected for competitive BlueDot AI Safety cohort
- [Dexter](#) (Sep 2025 – May 2026): Built AI redaction tool for consulting slide decks, saving ~125 hours per consultant annually; piloted with BCG and OC&C, refined across 15+ consultant interviews to fit real workflows

LEADERSHIP EXPERIENCE

- **Columbia CS Department** (Jan 2025 – May 2026): Mentored 25 students per semester on full-stack apps, 600+ total; Figma-first workflow cut development time 50%
- **Anthropic** (Sep – Dec 2025): Scaled Claude Builder Club to 150+ members; ran 6 engineer-led workshops and a 75-student hackathon
- **CORE** (Sep 2022 – Dec 2024): Directed Almaxworks Accelerator, coaching 30+ founders and leading 5 Demo Days (100+ attendees) with Bain Capital Ventures
- **Columbia Daily Spectator** (Sep 2022 – May 2024): Head of product across three digital products; shipped CULPA features that grew traffic 200% and redesigned landing page serving 5.5M+ visitors

SKILLS

Languages: English (Native), Spanish (Fluent), Korean (Proficient)

Programming: Python, C/C++, Java, SQL, JavaScript, R

Robotics & ML: ROS 2, tinyMPC, OpenCV, YOLO, PyTorch, LangChain, Docker, AWS, Azure, PostgreSQL
